

23 Things For Research Data Management

The Challenge:

Build capacity within the library community around research data management, ensure libraries are aligned with other research data management service providers, and share practices as new library services evolve and mature.

What is the solution?

23 Things: Libraries for Research Data provides an overview of practical, free, online resources and tools that librarians can begin using today to incorporate research data management into the daily practice of librarianship. Available in 12 languages, the resource groups 23 free, online resources to help librarians address issues on data management such as Metadata, Digital Preservation, Data Repositories, Data Licencing and Privacy or Data Citation.

What is the impact?

23 Things is a recognized training concept that supports flexible, self-paced learning designed to progressively build participants' understanding of key concepts and gain experience in research data management. Libraries and librarians hold an immense responsibility and are adapting their function to making data reliably accessible and re-usable. 23 Things will help them in applying the principles of library science to solve problems and provide new services related to research data. It could also support them in their potentially daily work of organizing, classifying, and describing research data and developing standards for metadata to help make data more easily discovered, understood, and preserved or in that of promoting the scholarship of data by encouraging and enabling data citation, assigning identifiers to datasets, creating links between documents and data, and helping users properly attribute credit to data producers.
