Open Access Projekty

Open Access (OA – otvorený prístup) môžeme definovať ako poskytovanie on-line prístupu k vedeckým informáciám pre používateľa bezplatne a neobmedzene.

„Filozofia otvoreného prístupu je poskytnúť zdarma neobmedzený prístup k výskumu a jeho publikáciám bez porušenia autorských práv. Výskum financovaný daňovými poplatníkmi by mal byť dostupný daňovým poplatníkom bezplatne. Výskum je verejným vlastníctvom a mal by byť k dispozícii všetkým, bez ohľadu na ich platobné schopnosti.“¹

Myšlienka OA vznikla a rozšírila sa vďaka trom deklaráciám, známym aj ako BBB deklarácie:

- [Budapest Open Access Initiative](#) (Budapeštianska iniciatíva pre otvorený prístup),
- [Bethesda Statement on Open Access Publishing](#) (Bethesda vyhlásenie o otvorenom prístupe publikovania),
- [Berlin Declaration on Open Access to Knowledge in the Sciences and Humanities](#) (Berlínska deklarácia otvoreného prístupu k poznatkom prírodných a humanitných vied).

„Tieto deklarácie vytvorili na začiatku 21. storočia prostredie pre OA publikovanie pre nasledujúce desaťročia. Ich vyhlásenia naznačili silné filozofické základy pre podporu myšlienok a princípov otvoreného prístupu.“¹
