- Are you uncertain on metadata standards directory?
- Do you want to share your data but you are uncertain how?
- How should data resources be referenced through persistent identifiers?
- How to best define practices of how to deal with data automatically and in a documented way with computer actionable policy?
- You want to meet the best people in data management at the RDA Plenaries?

# RDA Recommendations that make data work

## “Create - Adopt - Use”

---

- ✓ Adopted code, policy, specifications, standards, or practices that enable data sharing
- ✓ “Harvestable” efforts for which 12-18 months of work can eliminate a roadblock
- ✓ Efforts that have substantive applicability to groups within the data community but may not apply to all
- ✓ Efforts that can start today

18 flagship recommendations & outputs with over  
75 cases of adoption in different domains, organisations and countries

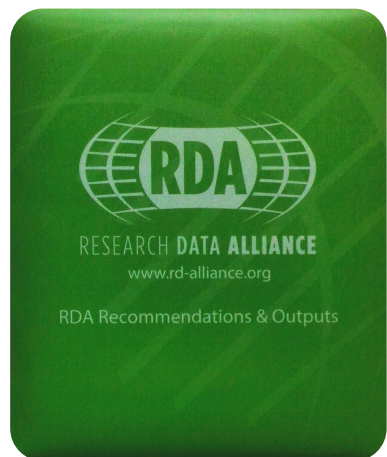

# RDA Recommendations & Outputs

## THE RDA OUTCOMES LEGEND

**Recommendations:** are the flagship outputs of RDA. They are RDA's equivalent of the “specifications” or “standards” that other organisations create and endorse. The process for creating and endorsing these is already defined.

**Supporting Outputs:** are the outputs of RDA WGs and IGs that are fruit of RDA work, but are not necessarily adoptable bridges. “Upon request”, these sort of outputs go through a community comment period and if no major objections or gaps are identified they get the RDA Brand.

**Other Outputs:** include workshop reports, published articles, survey results, etc. Anything a WG or IG wants to register and report. Upon request, these are published and discoverable on the RDA website but have no level of endorsement.

# Call for Supporting and Other RDA Outputs

*If your group has produced something that you would like to share with the broader community, please send it to [enquiries@rd-alliance.org](mailto:enquiries@rd-alliance.org) and indicate whether you would like it to be considered as a 'Supporting' or 'Other' output.*
