

Transcription of the A0 BoF Discussions on Mapping the Landscape of Mapping the Landscape Activities RDA Denver Plenary

A0 notes

In any MLT we need to

- A) Understand the relationships
- B) Get from A to B
 - a. Ie what is the end game
 - b. What is the vision
- C) We have to know what other maps are out there

The key things are

- A) Who do people identify with
 - B) Are there any eInfrastructures not identified
 - C) Which nodes have relevance
 - a. Keep it at a coarse scale
 - b. Mapping organisations at the highest level
 - D) No one is duplicating yet, but the time is right to bring the MLT exercises together
 - E) They are being done for
 - a. Social purposes
 - b. Data purposes
 - c. Research purposes
 - F) Need to be clear on what the MLT is not.
- } cross pollination across all 3

Missing the following groups:

- A) Open Scholarship Initiative
- B) Educopia
- C) GEO

There is a Bias of the current MLT's on GEO

If INPUT – get user perspective

What do we need?

- A) Dublin Core of organisations – ie 5 common attributes
 - a. eg CRIS
- B) Data Technologies
- C) Information Model

Choices for next steps

- A) Do we need an Interest group - First steps
- B) Do we need a Working Group – Next steps
- C) Do nothing further – Not an option
- D) Should it be with RDA? - Definitely

A)
