- **Research Data Alliance Vision:**

Researchers and innovators openly share data across technologies, disciplines, and countries to address the grand challenges of society.

- **Research Data Alliance Mission:**

RDA builds the social and technical bridges that enable data sharing.

RDA Approach: CREATE → ADOPT → USE

10

RDA Members come together as

- **Working Groups** – 12-18 month efforts to build, adopt, and use specific pieces of infrastructure
- **Interest Groups** – longer-lived discussion forums that spawn Working Groups as specific pieces of needed infrastructure are identified.

Working Group efforts focus on the development and use of data sharing infrastructure

- **Code, policy, infrastructure, standards, or best practices that are adopted and used** by communities to enable data sharing
- **“Harvestable” efforts** for which 12-18 months of work can eliminate a roadblock
- **Efforts that have substantive applicability** to groups within the data community, but may not apply to everyone
- **Efforts for which working scientists and researchers can start today**
