Keeping Digital Audio-Visual Data Alive: Expressing Preservation Needs

Naresh Kumar, DILL (International Master Digital Library Learning) Scholar,
CNR-ISTI, Pisa, Italy E-Mail- nareshiiim.kumar@gmail.com

**Aim:**
Matching Preservation Tools with Needs of Audio-visual Applications in Different Communities of Practice

**Issues:**
- High fission of information in Audio-visual form
- Frequent and continuous change in preservation technology
- Lack of awareness about AV data preservation among communities of practice

**Solutions:**
- Create awareness about AV preservation tools and applications among communities of practice.
- Create infrastructure that can match suitable preservation tools for communities of practice’s AV preservation needs.

**Objectives:**
- To show how to express Audio-visual data preservation needs formally
- To collect AV preservation needs of different communities of practice

**Presto4U Knowledge Schema (UML Representation)**

**Expressing AV Data Preservation Needs**

Presto4U is dedicated to build such infrastructure for AV collections.
