

- AuScope is the national provider of integrated research infrastructure to realise the potential of Australian Earth and Geospatial Science researchers
- It has 6 infrastructure components
  1. Geospatial and Geodesy
  2. Geophysics
  3. Geochemistry and Geochronology
  4. Virtual Core Library
  5. Modeling and Simulation
  6. Data and Informatics
- Key Question: what is going on internationally in equivalent activities to these?
