

CLARIN and the adoption of the RDA's *Data Foundation and Terminology*

Dieter Van Uytvanck

Technical Director CLARIN ERIC

dieter@clarin.eu

2015-03-08

RDA Adoption Day
San Diego

CLARIN?

- **Common Language Resources and Technology Infrastructure**
- European (ESFRI) Research Infrastructure – ERIC since February 2012
- aims at providing easy and sustainable access for scholars in the **humanities and social sciences**
 - to **digital language data** (in written, spoken, video or multimodal form)
 - to **advanced tools** to discover, explore, exploit, annotate, analyse or combine them

CLARIN centres

- A **distributed architecture**: (http-accessible) files, web applications and web services spread all over Europe
- Nodes in the network: **centres** (<http://clarin.eu/centres>)
- Some of them password-protected (licenses, privacy, ...)
- User base: also spread over Europe (and rest of the world)

services to researcher

Organisation CLARIN

- **Members:** countries (AT, DK, CZ, DE, EE, GR, LT, NL, NO, PL, PT, SE) and international organisations (Dutch Language Union)
- **Resources & Services provided** (<http://clarin.eu/services>):
 - Access to language resources (including federated login when needed)
 - Access to language resource processing applications/services
 - Depositing services
 - Metadata catalogue: Virtual Language Observatory
 - “Glue components” like the Virtual Collection Registry (<http://clarin.eu/vcr>)
 - Consulting services
 - (+ a whole set of technical services behind the scenes)

Core of DFT

(Source: DFT 2: Analysis & Synthesis)

In the core is the concept of a **digital object** which:

- is represented by a **bitstream** (instantiations of which can be stored in several repositories)
- is referenced by a **persistent ID**
- is described by **metadata** and
- can be **aggregated to digital collections**.

Absolute spatial deixis and proto-toponyms in Kata Kolok

General

Name: Absolute spatial deixis and proto-toponyms in Kata Kolok

Type: extensional

Creation Date: 2014-09-26

Description: Digital references for De Vos, C. (2014). Absolute spatial deixis and proto-toponyms in Kata Kolok. NUSA: Linguistic studies of languages in and around Indonesia, 56, 3-26.

Purpose: research

Reproducibility: intended

Persistent identifier: hdl:11372/VC-1001

Keywords:

- sign language
- Kata Kolok

Creators

Person: Connie de Vos

Organisation: Max Planck Institute for Psycholinguistics

Website: <http://www.mpi.nl/people/vos-connie-de>

Role: Researcher

Resources

Reference

Type

Journal Article (fulltext)

This paper presents an overview of spatial deictic structures in Kata Kolok, a sign language which is indigenous to a Balinese village community.

Resource

Footnote 3 - video

Absolute versus absolute transpositional pointing signs

Feedback as early adopter

- Very handy to have a lingua franca when discussing research infrastructure architectures
- It was good to be involved as adopting community from the start of the work
- Would be good to have a single and concise summarizing document / webpage (with a PID :)

Thank you for your attention!
