

RDA Collections Property Fields

Service capabilities

- pidProviderType
- enforcesAccess
- supportsPagination
- synchronousActions
- rulesBasedGeneration
- *providesVersioning*
- *allowsRecursiveness*
 - *local/remote*
- *hasItemStore*
 - *local/remote*
 - *for <types>*
- *supportsSetOperations*
 - *findMatch*
 - *intersection*
 - *union*
 - *flatten*

Collection properties

- ownership
- license
- modelType
- hasAccessRestrictions
- memberOf
- descriptionOntology

Collection capabilities

- isOrdered
 - *w/ Random access or append/prepend*
- supportsRoles
- membershipsMutable
- metaDataIsMutable
- maxDepth
 - *implies recursiveness*

- *flag for full recursiveness*
- *isHomogenous*
 - *withType*
- *maxLength*

Item mapping functions

- *role*
 - *default/canonical item*
 - *categories*
 - *multiplies roles per item?*
 - *should roles be just unary relations?*
 - *or allow binary or 1:N relations?*
- *index*
- *dateAdded*
