

Agrisemantics WG Maintenance Plan

For the year 2020

Authors: Caterina Caracciolo, Sophie Aubin, Brandon Whitehead

The output of the Agrisemantigs WG (“39 Hints to Facilitate the Use of Semantics for Data on Agriculture and Nutrition¹”) will be maintained by the Agrisemantics Working Group. A steering group composed of the chairs and interested members of the group will meet twice a year, online or face to face, to revise the recommendations and discuss the actions needed to increase their adoption.
