What are the Challenges Being Faced?

- Timeliness
- Data quality
- Interoperability
- Trust in data
- Security and privacy
- Governance
- Policies and standards

What are the Objectives?

- Privacy
- Security
- Interoperability
- Trust
- Timeliness
- Data quality
- Governance
- Policies and standards

What are the Key Recommendations?

- Establish a global framework for data sharing
- Set up a data sharing infrastructure
- Create a network of data repositories
- Develop standards and guidelines
- Promote data reusability
- Enhance data sharing and interoperability

A Collaborative Cross-Disciplinary Effort

The Research Data Alliance (RDA) COVID-19 Recommendations and Guidelines on Data Sharing present a comprehensive approach to ensuring that data sharing and data management practices are effective, efficient, and sustainable. The guidelines highlight the need for a collaborative cross-disciplinary effort, involving researchers, funders, publishers, and policymakers, to develop and implement effective data sharing practices.

The guidelines are intended to

- Provide a framework for data sharing during and after pandemics
- Facilitate the sharing of data generated by research projects
- Enhance the reusability and accessibility of data
- Support the development of new research initiatives

The guidelines include recommendations for

- Data management and sharing practices
- Data quality and integrity
- Data accessibility and reusability
- Data security and privacy
- Data governance and stewardship

The guidelines also highlight the importance of

- Establishing a global framework for data sharing
- Creating a network of data repositories
- Developing standards and guidelines
- Promoting data reusability
- Enhancing data sharing and interoperability

The guidelines are designed to help

- Researchers share their data
- Policymakers make informed decisions
- Funders support data sharing initiatives
- Publishers disseminate research findings

The guidelines are

- Open access
- Global
- Multi-disciplinary
- Multistakeholder

The guidelines

- Provide a roadmap for data sharing during and after pandemics
- Highlight the importance of data sharing in research
- Offer recommendations for researchers, funders, and policymakers

The guidelines

- Are available at rda.org
- Are updated regularly to reflect new developments
- Are designed to be

- Accessible
- User-friendly
- Relevant

The guidelines

- Are intended for

- Researchers
- Policymakers
- Funders
- Publishers

The guidelines

- Are

- Open access
- Global
- Multi-disciplinary
- Multistakeholder

The guidelines

- Provide a framework for data sharing during and after pandemics
- Facilitate the sharing of data generated by research projects
- Enhance the reusability and accessibility of data
- Support the development of new research initiatives

The guidelines

- Are available at rda.org
- Are updated regularly to reflect new developments
- Are designed to be

- Accessible
- User-friendly
- Relevant
