Welcome to Norway's Reproducibility Network
Towards open & reproducible science

Our Mission

The Norwegian Reproducibility Network (NORRN) is a peer-led network that aims to promote and enable rigorous, robust and transparent research practices in Norway. We attempt to achieve this goal by establishing appropriate training activities, designing, and evaluating research improvement efforts, disseminating best practices, and working with stakeholders to ensure coordination of efforts across the sector. NORRN's activities span multiple levels, including researchers, librarians, institutions, and other stakeholders (e.g., funders and public authorities).
The UK Reproducibility Network (UKRN)

The UK Reproducibility Network (UKRN) is a national peer-led consortium that aims to ensure the UK retains its place as a centre for world-leading research. We do this by investigating the factors that contribute to robust research, promoting training activities, and disseminating best practice. We also work collaboratively with various external stakeholders to ensure coordination of efforts across the sector.

Coordinate activity in three focus areas:

1. **Education**
designing and establishing appropriate training activities

2. **Communication**
disseminating new evidence, propagating best practices, and promoting culture change

3. **Transformation**
designing and evaluating research improvement measures and policy in collaboration with stakeholders
Grassroots journal club initiative that helps researchers create local Open Science journal clubs at their universities to discuss diverse issues, papers and ideas about improving science, reproducibility and the Open Science movement.
