## Build your DMP by following a decision tree with defined questions

[elixir-no.ds-wizard.org](https://elixir-no.ds-wizard.org)

4.a.2

Do suitable 'Minimal Metadata About ...' (MIA...) standards exist for your experiments?

Horizon 2020 DMP

Sigma2

Many research fields have worked together to define what kind of metadata should really be collected when an experiment of a certain kind is performed and described. That information is described in a Minimal Metadata Standard. Often, these standards describe both what kind of information needs to be collected as well as the format in which it is expected.

☒ Desirable: *Before Submitting the Proposal*

☒ External links: [FAIRsharing repository of standards](#)

## ONTOLOGY SEARCH

[Home](#)[Ontologies](#)[Documentation](#)[About](#)

### Welcome to the EMBL-EBI Ontology Lookup Service

[Search](#)

Examples: [diabetes](#), [GO:0098743](#)

[Looking for a particular ontology?](#)

### About OLS

The Ontology Lookup Service (OLS) is a repository for biomedical ontologies that aims to provide a single point of access to the latest ontology versions. You can browse the ontologies through the website as well as programmatically via the OLS API. OLS is developed and maintained by the [Samples](#), [Phenotypes](#) and [Ontologies Team](#) (SPOT) at EMBL-EBI.

### Related Tools

In addition to OLS the SPOT team also provides the [OxO](#), [Zooma](#) and [Webulous](#) services. [OxO](#) provides cross-ontology mappings between terms from different ontologies. [Zooma](#) is a service to assist in mapping data to ontologies in OLS and [Webulous](#) is a tool for building ontologies from spreadsheets.

### Report an Issue

For feedback, enquiries or suggestion about OLS or to request a new ontology please use our [GitHub issue tracker](#). For announcements relating to OLS, such as new releases and new features sign up to the [OLS announce mailing list](#)

### Data Content

Updated 28 May 2021 08:03

- 264 ontologies
- 6,460,093 terms
- 32,279 properties
- 497,528 individuals

### Tweets by @EBIOLS

<https://www.ebi.ac.uk/ols/index>

## Adaptable (configuration requires domain knowledge):

Proprietary ELNs/LIMS - often poor support for ontologies

openBIS - open source ELN/LIMS

SEEK

# Challenges

Standards & Repositories historically grown:

- ... some predate CC licenses (terms of usage  $\approx$  public domain)

- ... some standards predate DDI, datacite, dublin core

- ... own PID system (identifiers.org), not all repos issue DOIs (yet)

  - searchability can depend on dataset search engine

- ... large curation effort for legacy data >160 PB (EBI repos 2018)

- ... parallel development: certification procedures: EDD|ECR vs CoreTrustSeal

## In vivo Nord 1: Chlorpyrifos-methyl

 Unsubscribe

 New Study based on this one

 Add new ▾

 Actions ▾

**Aim:** To investigate whether Atlantic cod that feed close to aquatic breeding facilities are affected by chlorpyrifos-methyl. Feeding experiment with chlorpyrifos-methyl, an organophosphorous pesticide detected in plant based salmon feed. Based on previous experiments using salmon.

**Doses:** 0, 0.5, 5.0, 25 mg/kg) chlorpyrifos-methyl. **Duration:** 30 days **Set-up:** Three tanks per treatment (12 in total)

**Samples include:** Liver, plasma, bile, brain. **Analysis include:** - Have RNAseq and metabolomics from 36 liver samples - Plasma cholinesterase, cortisol, ASAT, ALAT, and total protein (36 samples) - EROD on liver samples (36 samples) - Chemical levels of chlorpyrifos-methyl and main metabolite TCP in liver and bile (36 samples) - Hypoxia stress test (72 samples)

Reproduction of simulations (SED-ML)

The Systems Biology Markup Language

**Selected:** ReCod - Draft Metabolic Reconstruction of Atlantic cod (Study)

**Description:** No description

**SEEK ID:** <https://fairdomhub.org/studies/423>

Tree Split Graph

Fullscreen

- In silico - computational bioinformatics, reconstruction, and modeling
  - ReCod - Draft Metabolic Reconstruction of Atlantic cod
    - Draft metabolic reconstruction model of Atlantic cod liver
      - Draft metabolic reconstruction model of Atlantic cod liver generated from gadMor3 and iHepatocyte2322
      - Draft metabolic reconstruction model of Atlantic cod liver generated from gadMorTrinity and iHepatocyte2322
      - Draft metabolic reconstruction model of Atlantic cod liver generated from gadMor1 and iHepatocyte2322
      - Visualization of gap filling of subsystem "Metabolism of xenobiotics by cytochrome P450"
      - Draft metabolic reconstruction model of Atlantic cod liver generated from gadMor3 and iHepatocyte2322
      - Draft metabolic reconstruction model of Atlantic cod liver generated from gadMorTrinity and iHepatocyte2322
      - Draft metabolic reconstruction model of Atlantic cod liver generated from gadMor1 and iHepatocyte2322
    - ReCodLiver0.9: Overcoming Challenges in Genome-Scale Metabolic Reconstruction of a Non-model Species

# Experiences from dCod 1.0

- Little data management experience
  - traditional repositories (like GEO and ArrayExpress)
- No allocated funds in project budget
  - no specified data manager
  - ...but received funding from DLN for getting started and coursing

# Experiences from dCod 1.0

- Little data management experience
  - traditional repositories (like GEO and ArrayExpress)
- No allocated funds in project budget
  - no specified data manager
  - ...but received funding from DLN for getting started and coursing
- Transdisciplinary projects need good data management!
  - An eye-opener for the possibilities of data management
- How to change old (bad) habits?
  - Support
  - Clear guidelines and expectations
  - Carrots?
