

Health Data Interest Group @VP19

The usage of digital twins in healthcare for personalised care

20th June 2022, 7:00 - 8:30 UTC – Seoul, Dragon City Venue Complex

Co-Chairs: Edwin Morley-Fletcher, Yannis Ioannidis

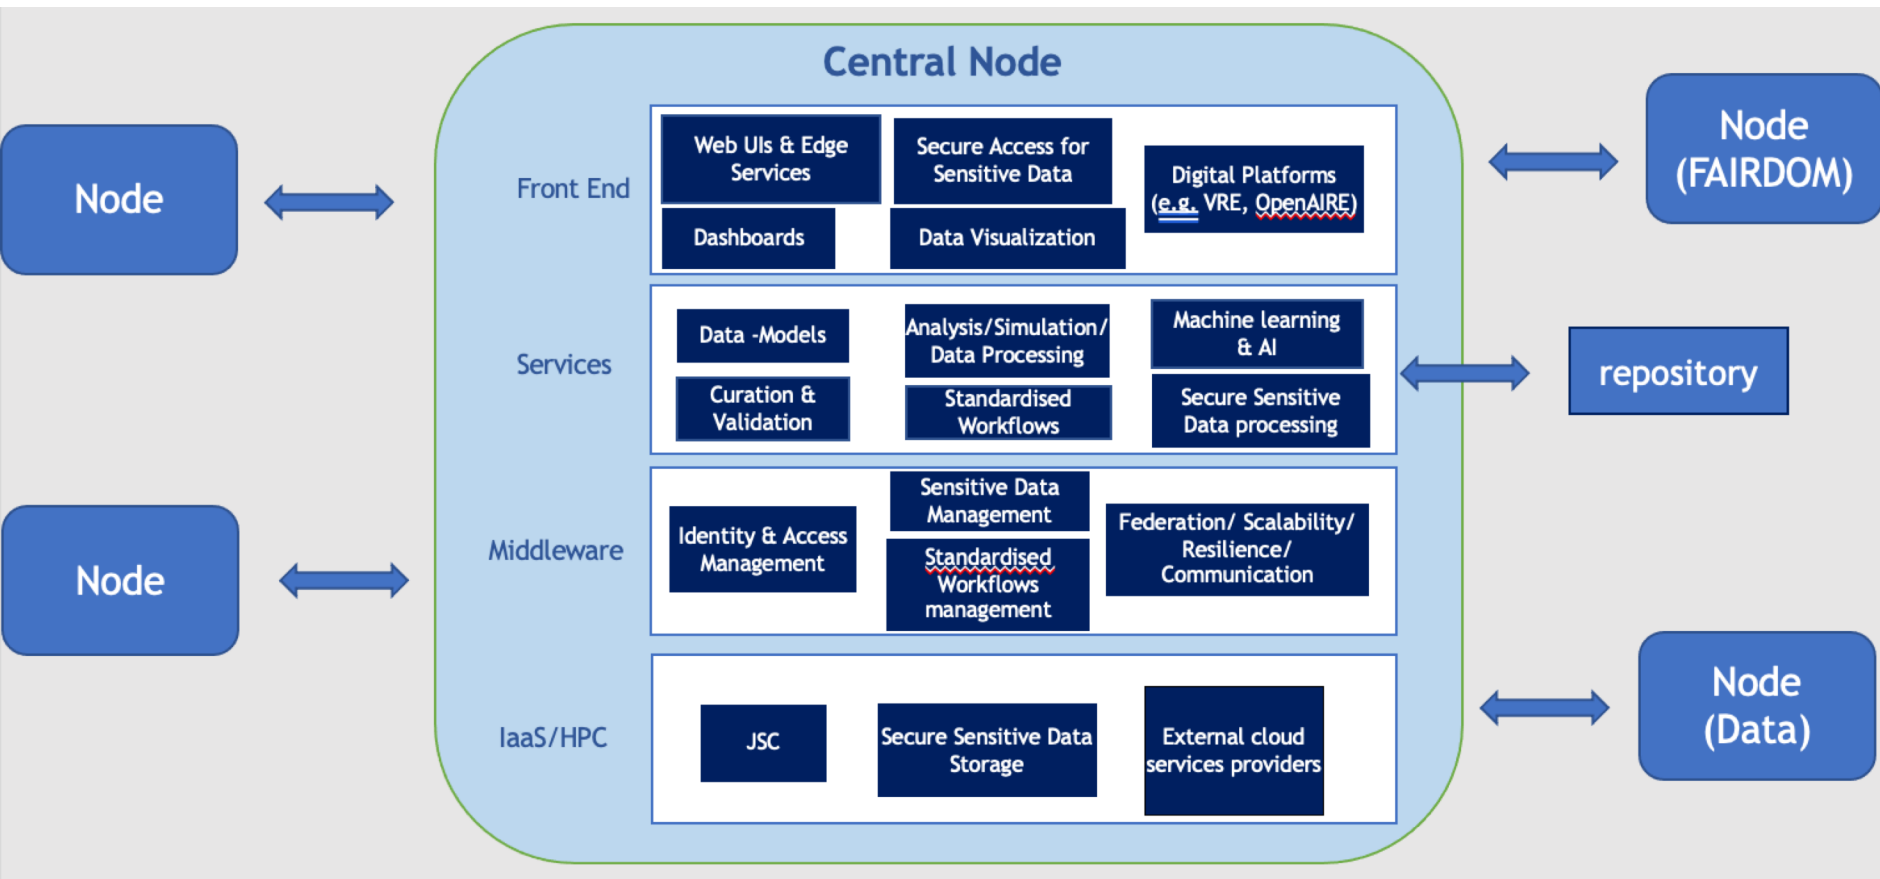

research data sharing without barriers
rd-alliance.org

- Practical reasons
 - Cost of centralization too high
 - Volume of data too big and sensitive
- Privacy reasons
 - Sensitive data
 - Rules and regulations
 - Competitive advantage

- Modelling and simulating health issues
- Exploit the experience of successful / established platforms
- Based on FAIR Principles

Abstract Architecture

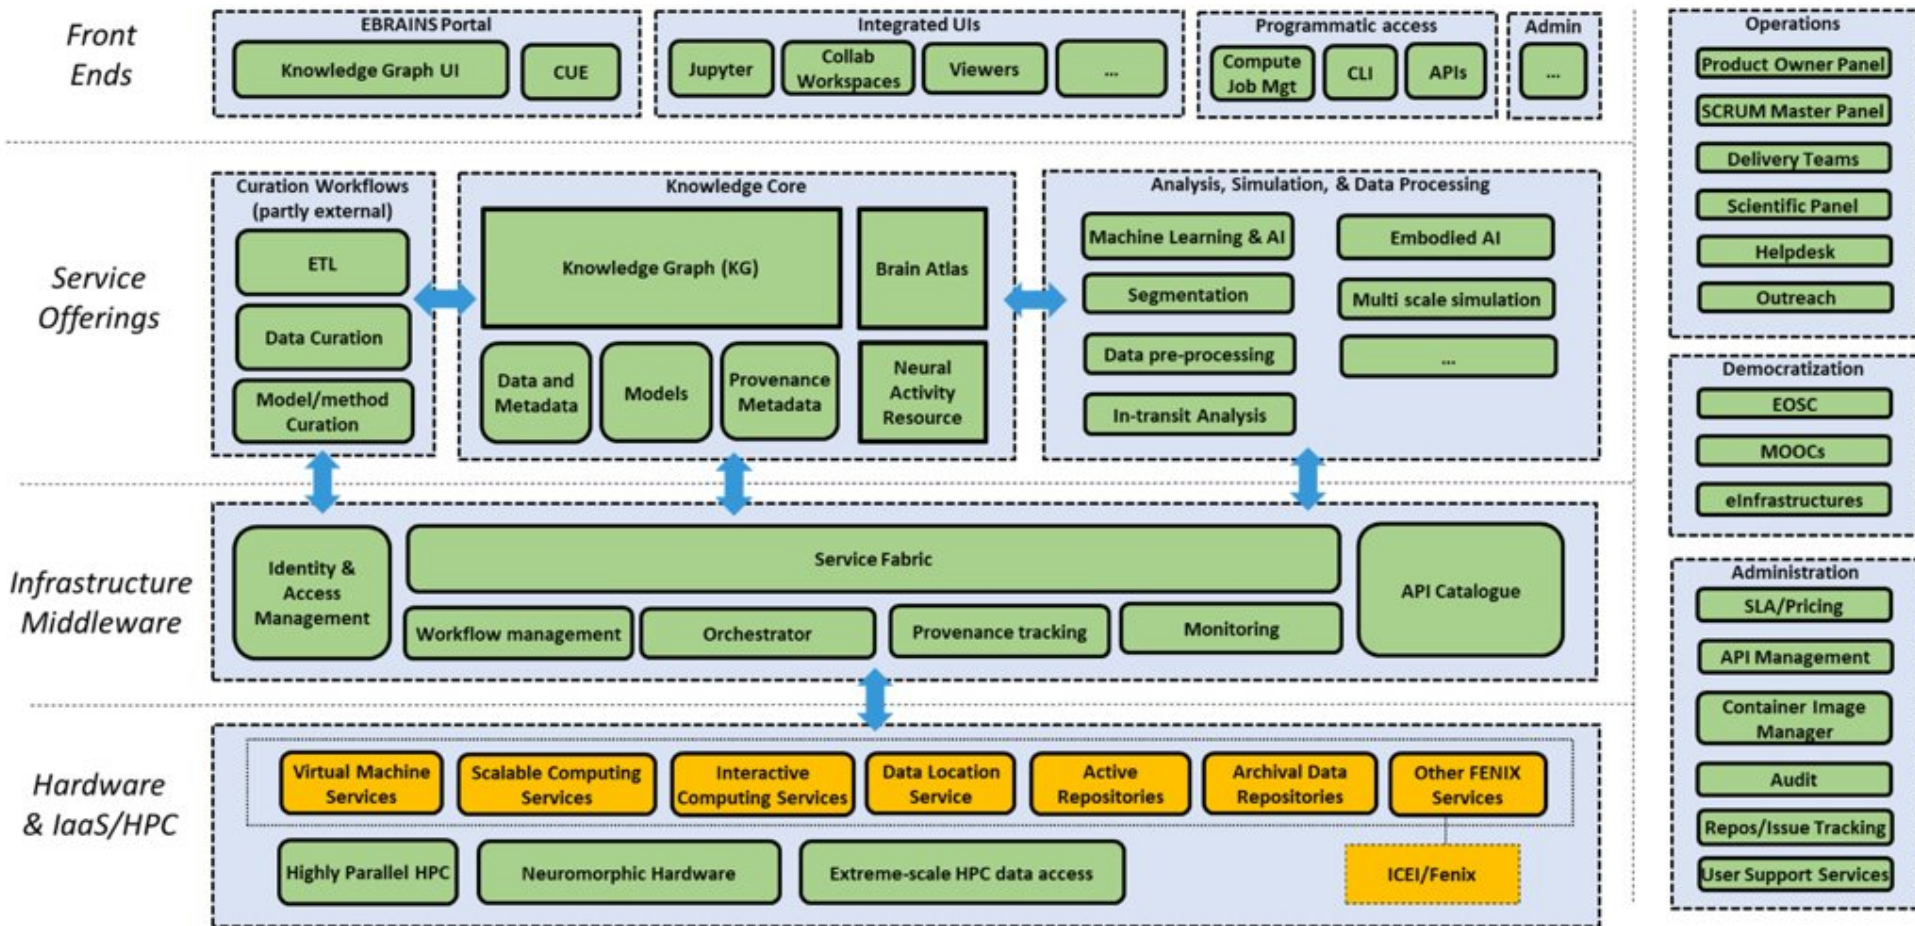

4

- Design
 - FAIR principles
 - Taxonomy of resources to be included
 - Policy recommendations
- Catalogue
 - Inclusion criteria and mechanisms
 - Interoperability standards
 - Gateway architecture
- Standardization
 - Data input (metadata harmonization, interoperability)
 - Modelling (model building, formatting, semantics, annotation)
 - Model simulation (reprod, parameterization, description, execution)

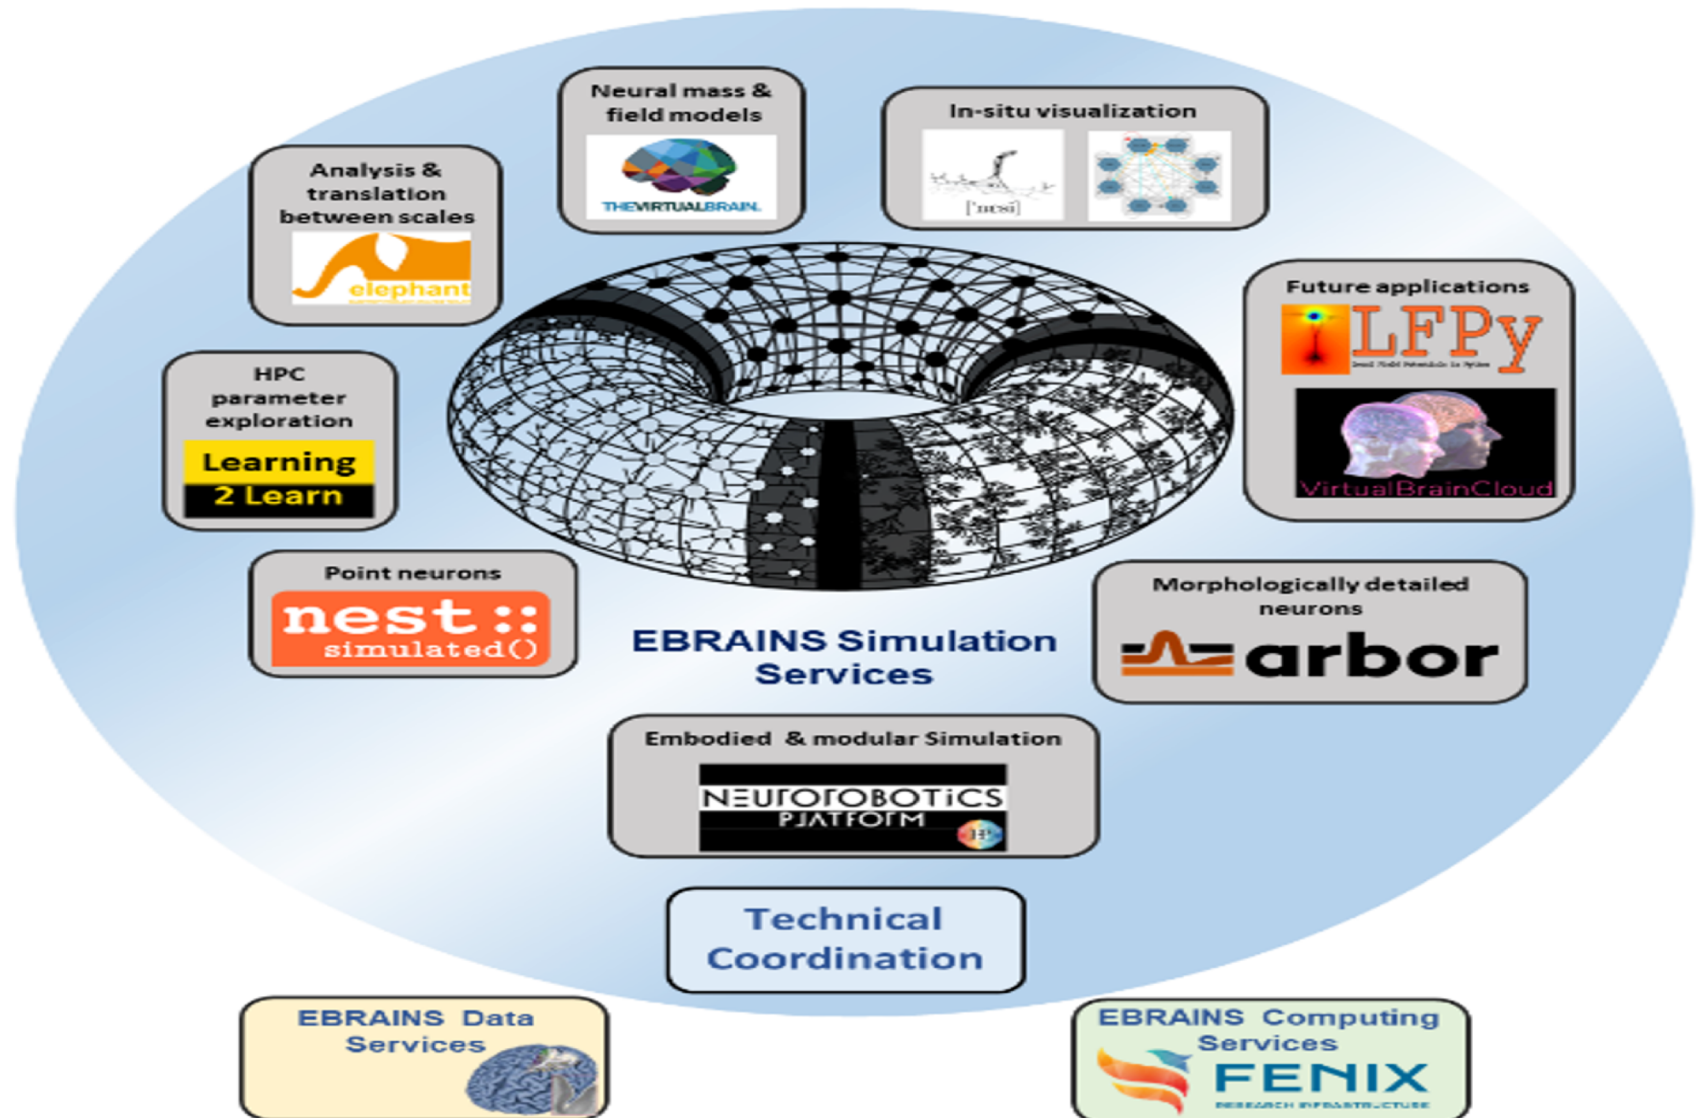

High-Level Architecture (for brain)

6

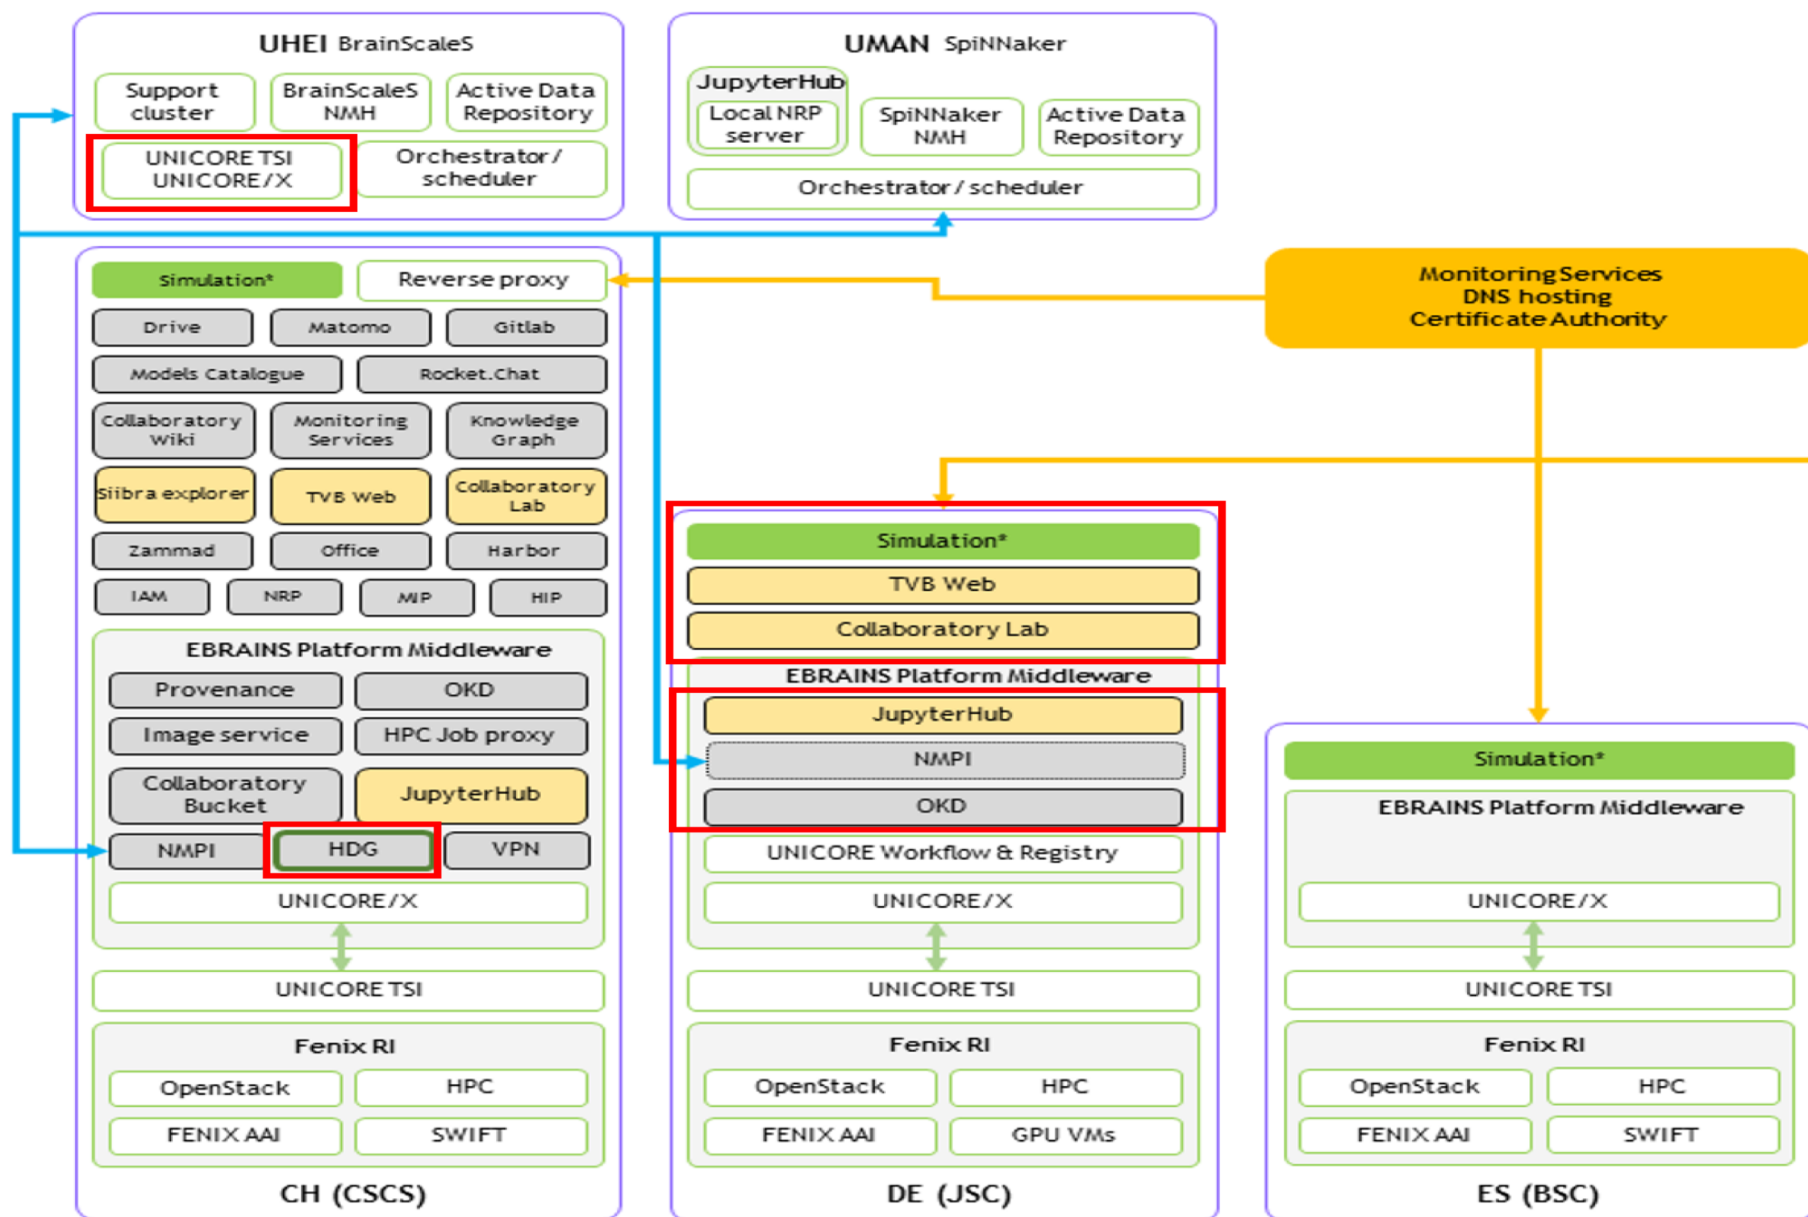

Multi-Level Twins (for brain)

7

Physical Deployment Complexity (EBRAINS)

Long and Exciting Way Ahead!
