GO BENEATH THE SURFACE

Evidence
Based Medicine

Intelligence
Based Medicine

The First International Multidisciplinary Symposium on
Artificial Intelligence in Medicine:

Analytics and Algorithms, Big Data, Cloud and Cognitive Computing, and Deep Learning in Medicine and Healthcare

CONFERENCE THEMES

Decision Support and Hospital Monitoring

Medical Imaging and Biomedical Diagnostics

Precision Medicine and Drug Discovery

Cloud Computing and Big Data

Digital Medicine and Wearable Technology

Robotic Technology and Virtual Assistants

FEATURED SPEAKERS

Anthony C. Chang, MD, MBA, MPH, MS

Daniel Kraft, MD

Enrico Coiera, PhD

Jeremy Howard

Arvin Agah, PhD

Wen Dombrowski, MD, MBA

> " Medical data is the **fuel**, artificial intelligence is the **rocket**, and those who use artificial intelligence in medicine and healthcare will be the **astronauts** for moonshot projects. "
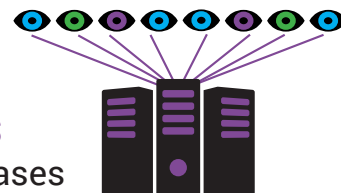

DID YOU KNOW?

IBM's Watson supercomputer can read **40 million documents** in **15 seconds**

Google's DeepMind uses artificial intelligence from **ONE MILLION EYE SCANS** to help diagnose eye diseases
