Subject: RDA VP26 Final Updates & Session Summary Deadline

Dear RDA VP26 Session Chairs,

The RDA's 26th Plenary Meeting (VP26) has officially come to a close!

Thank you to everyone who contributed a session to VP26, held under the theme of 'Data for Emerging Technologies'. The discussions were lively and drew meaningful engagement from all involved. Below are the final updates:

- **Recordings and presentation slides** are available for all VP26 registrants on Whova. Navigate to [Agenda](#) > Sessions > Session of interest > click 'Play button' for recordings and for presentation slides > scroll down under the session description and click 'Presentation slides'.
- **Zoom Chats** are saved in [this folder](#) and also linked from your **collaborative session notes**
- **Your feedback** matters: please spare a couple of minutes of your time to share any thoughts you might have in [our survey](#), so we can improve future plenaries.
- **Session summaries:** please fill out a table in your [collaborative notes](#) **before Thursday, 2nd April**. The content will be used by the Technical Advisory Board to highlight your work to the RDA community.

All session recordings and presentation slides will be available to the wider community on 21 April 2026 [here](#).

We hope to see you at the next RDA Plenaries! In the meantime, keep up to date with all RDA activities on our [website](#) and [LinkedIn](#).

Kind regards,
Irina Hope
RDA VP26 Organising Committee Chair
